SS Analysis Beets, 10s, 5 1/4d. Per Ton, \$84.00.

PRICE FIVE CENTS.

ADMIRAL IJICHI WIRES FOR PILOTS

Japanese Squadron Will Arrive Here at 9 o'Clock.

At 9 o'clock this morning the Japanese squadron, comprising the cruisers Aso and Soya under command of Admiral Ijichi, will arrive off port, at which time two pilots will be in readiness to bring the vessels into the naval station docks.

At 10:30 o'clock last night the wireless operator got in touch with the flagship Aso and received a message for the naval station from the Admiral giving notice of the time of arrival off port and asking that the pilots be notified. The Admiral expects to be in port about 10 o'clock.

Since the squadron was here, while the Legislature was in session, they have visited San Diego, San Francisco, Seattle and Victoria, receiving ovations all along the Coast, the Admiral and his officers and crews being guests of honor on many notable occasions. The Admiral was received with honors by the Admiral commanding the Pacific fleet, the Mayor of San Francisco, and was present at the opening of the Alaska-Yukon exposition.

Arrangements have been made by local committees, headed by Mr. Tokieda of the Yokohama Specie Bank, to receive the Admiral on arrival this morning and there will be a fine display of day fireworks fired from the docks. The reception committee will go out in a launch and meet the flagship outside the channel.

A PLEA FOR THE UNDERPAID

Cathcart Asks More Pay for Deputies Brown and Milverton.

The following, addressed to the Mayor and members of the Board of Supervisors by the City Attorney, was read at the supervisors' meeting yesterday:

"Gentlemen: I would request that the salaries of the deputies in this department be fixed at the following sums:

"First Deputy, \$225 per month.

"Second Deputy, \$200 per month.

"At the time the salaries of the deputies of this department were fixed, the trial of all felonies in the county and the presentation and finding of all indictments were in the hands of the Attorney General. Under the present system, all grand jury matters are attended to by this department, as well as practically all criminal prosecutions of whatsoever nature. The various acts passed at the recent session of the Legislature give to the city and county vastly increased powers, and consequently increased duties on the part of the law officers of the city and county.

"Ordinances which of necessity will be passed by the board under the additional sanitary and police powers granted, will undoubtedly result in numerous prosecutions for violations of such ordinances.

MAYOR MAY HAVE AN AUTO IF HE SHARES THE RIDES

There is no money in sight for the Promotion Committee from the city treasury, so Supervisor Daniel Logan asserts. He is afraid that after the plan for helping the hospitals goes through, and from this amount he hopes to give something to the Associated Charities, there will be little or no money for other outside matters.

Supervisor Logan stated yesterday that he has planned and planned and so far he has a plan to jump a certain amount for the hospitals, and from this there may be an opportunity to support the Associated Charities to the extent of \$100 or \$150 per month. Otherwise he is afraid the Mayor will be swamped by personal individual requests for help.

As to the auto proposed for the

SAYS HE CAN'T GET ASSISTANCE

Lightfoot Files Motion for a Continuance in Riot Cases.

Attorney J. Lightfoot, counsel for the Japanese accused in connection with the higher wage agitation, filed a motion yesterday for a continuance of the cases before Judge Robinson against Jotaro Mikawa and twelve Japanese indicted for riot.

Among the assertions that are incorporated in the attached affidavit by Lightfoot is one stating "that it is impossible to secure a reputable attorney to conduct this trial without the payment to him of a larger sum of money than these defendants can obtain."

Attorney Lightfoot also states "that if this trial proceed on said 25th day of June, it will result in depriving these defendants of their constitutional rights and the assistance of counsel in said trial."

It is also stated that unless a continuance is granted it will be necessary for the Japanese to go to trial without counsel, Lightfoot being busy with his case in Judge De Bolt's department of the Circuit Court.

Sugawara Pleads.

Sugawara, the collector for the Higher Wage Association, entered a plea of not guilty to a charge of assault and battery, before Judge De Bolt yesterday. Bail was fixed at \$500 and the case went on the calendar in its regular order.

When Sugawara was called upon to plead George Yamada, the Federal Court interpreter, who has been assisting in Judge De Bolt's department since Chester Doyle has been aiding High Sheriff Henry, was not present.

Negoro, one of the defendants in the conspiracy cases, happened to be in the courtroom and the suggestion was made that he interpret the plea of the man. This he agreed to do, but as soon as the proceedings were concluded Negoro asked for an interpreter's fee of \$2.50. Judge De Bolt demurred at first, but

MANY GIRLS IN JUVENILE COURT

Unusual Percentage Disclosed in Records of the Cases.

The records of the juvenile court, presided over by Judge Whitney, disclose a rather alarming percentage of girls that have figured in the proceedings since its institution shortly after the adjournment of the last Legislature.

Of the seventy-nine cases that have been disposed of by the juvenile court twenty-five girls were involved and in the majority of instances the charges were of a serious nature. This is a far greater percentage than is shown by the records of the juvenile courts on the mainland which show that one in ten cases girls were the defendants.

Judge Whitney states that the number of girls brought before him has been out of proportion to the experience of the juvenile courts on the mainland, but says that some comfort may be found in the fact that the experience of the first few months of the juvenile court should not be taken as final, and that the number of girls brought before it may be due to the establishing of the court, rather than an increase in the number of girl offenders.

Court Handicapped.

The juvenile court is operating with signal success, the only thing that tends to handicap its efficiency is the crowded condition of the Boys' Industrial

OUR POL TASTES GOOD TO THEM

Island Girls at the Fair Welcome the Home Fare.

The Hawaii building at the Alaska-Yukon Exposition at Seattle is certainly making a big hit with fair visitors, and is receiving much publicity. In fact, this is where W. J. Cooper, the Promotion Committee's special representative and publicity man for the Hawaii exhibit is showing up well, for many of the stories appearing in the Coast papers of the doings at the Hawaii building are from his pen.

Secretary H. P. Wood, of the Promotion Committee, received a long letter from Mr. Cooper in the last mail, and it is full of local interest. He says in part:

"My Dear Mr. Wood: This is the first opportunity I have had to write to you, although I have been here for six days now. Business is exceedingly brisk. Everybody has been working almost night and day, but we have gotten things started and straightened out sufficiently for the crowds to get through the building. Yesterday we opened for the first time, and today the crowds are coming in fast. We have one of the very best locations on the ground, and I feel sure we shall have a very prosperous season.

Hawaiian Fish Amaze.

"Our trip on the Dix was uneventful. The weather for the most part was good, although we had several days rain, which made it disagreeable. Thanks to smooth seas all the way, we got the plants here in very good condition, and they will add materially to the decorations of the building. The fish also arrived, with a loss of but three, although I think one has died since we arrived. Yesterday there were one hundred and seventeen living. We found absolutely no preparation to receive them. The reason assigned by the officials of the United States Fish Commission was that they had no idea that we could carry out our promise to bring Hawaiian fish here, and so had felt safe in making any kind of promise to take care of what we brought. They were not at first disappointed.

CITY FATHERS GET PRICES ON SPOONS

At the special meeting of the Board of Supervisors yesterday afternoon tenders were received for the building of a kitchen and bathroom for the county jail which the county takes over from the Territory July 1, the contract being awarded to the lowest bidder, Otto Ose, his bid being \$624. The remaining bids were: Fred Harrison, \$945; E. P. Chanin, \$796; S. C. Hardesty, \$52; John Oederkirk, \$920; H. K. DeFries, \$842; Wm. G. Chalmers, \$937; H. F. Bertelmann, \$680; Geo. T. Green, \$756.

Much of the time of the session was devoted to the reading of tenders for supplies for the new kitchen and county jail in general, ranging from tin table dishes to a mixing spoon. These were referred to the police committee.

K. Matsumoto, a contractor, was granted permission to erect a fence in front of premises between the Hub and Empire Theater on Hotel street while erecting a building. A. F. Cooke asked the Board to clean up and finish 9th avenue, Kaimuki, because portions of it were impassable. J. A. R. Vieira asked the Board to look after a street in the vicinity of Lishman's quarry. E. A. Douthitt asked the Board to build a street off Waialae road in the Kaimuki district and showed blue prints of the proposed route.

Adjourned to June 25 at 7:30 p. m.

WINTER TRIP FROM LOS ANGELES CERTAIN

Secretary Wiggins of the Los Angeles Chamber of Commerce, informed W. J. Cooper, publicity representative of the Hawaii Promotion Committee at Seattle, that he is enthusiastic over an excursion for next winter from Southern California to Honolulu, and stated that it would be sure to come off. He said he had seen a lot of persons who took the first trip a few years ago and they are so enthusiastic as to volunteer to make the coming trip even if they have to travel on the steamship Ohio again, if nothing better offers.

ROYAL FLUSH; NO BOBTAIL

Perpetual Motion Inventor Tells More About His Machine.

"When my machine is once out and adopted generally, steamboats will run without a pound of coal aboard, automobiles will not leave a trail of smoke behind them, the smoke nuisance will be no more, heating, cooking and household work will be done by electricity, and the world will be revolutionized."

Thus Christian Carl Tuck modestly described a part of the things his "perpetual motion" machine is to accomplish, the word "modestly" being used advisedly, because if he has what he firmly believes he has there is no limit to what can be done with it. "And I have the royal flush this time," he states; "it is no bobtail."

Mr. Tuck yesterday gave some further information about his idea, but declines to divulge any particulars concerning it until his foreign patents have been secured. He does not call it a "perpetual motion" machine. He dislikes that term, which has been associated so often with mechanical cranks that the use of it tends to discredit the user. "What his machine is, he says, is a "power creating machine," which differentiates it from all other machines for power, which are merely "power transmitting machines."

"I have simply figured out a way of applying old principles in a new way," says the inventor. "I do not care to say much more than this, except to state that the power is centrifugal power. I do not even claim to have originated the manner of utilizing it, having received my idea from a publication nearly a hundred years old. All I have done is to carry out the suggestions made there to a practical end. It will only be a short while until I will have my idea protected throughout the world and then I can announce it. In the meanwhile, on the advice of my attorneys, I am keeping quiet."

"I have studied many of the machines invented for perpetual motion purposes. I know how many of them ought to work theoretically, but don't work practically. I have read much about them, but I do not class mine among them. I have been working on my idea since I was a boy and I have working models, so that I know what

(Continued on Page Seven.)

GOVERNOR IS PLEASED WITH THE FINANCES

The present biennial period which comes to a close on June 30th will end with the surplus to be turned back to the Territorial Treasury from many of the departments. Governor Frear believes that the finances of the Territory are now in good condition and that there is every reason to believe that the new biennial period beginning on July 1 will be distinguished by the conditions that have prevailed in the last two years, during which it has not been necessary to register a warrant.

Governor Frear stated yesterday that the outlook for the territorial finances leave little to be desired, and with the exercise of economy and the policy that has prevailed during the course of the last two years, there should be no obstacle to be encountered.

Governor Frear stated that he supposed that there might be some reduction in the clerical forces of the Public Lands Department, Survey Department and the Department of Public Works under the consolidated scheme authorized by the last Legislature. He said that if the Legislature had made appropriation for the repairs to the Judiciary building the changes could have been carried out in a manner that would have permitted the three departments being placed together. He said that they would continue in their present quarters for the present at least.

NEW STEAMER LINE OPENS NEW MARKET FOR PINES

With the Toyo Kisen Kaisha steamers now on the regular run to South America, it is said that a new market has been opened for Hawaiian pineapples. In the mines of Peru—gold, copper and other minerals—canned goods are used as food to the exclusion of almost everything else. There are a good many Americans and Englishmen employed in the mines in the land of the Incas, and it is said that Hawaiian pineapples would be hailed with great delight down there. Pineapples are grown to a small extent in Peru, but their quality is greatly inferior to that of the Hawaiian varieties. The South American pine-

VISAYAN MUTINEERS OVERTAKEN AND THEIR LEADER MEETS DEATH

Senate Increases Duty on Pines---Blue Once More for Army Uniforms---Hot Waves Bring Death and Sickness.

(Associated Press Cablegrams.)

DAVAO, Mindanao, Philippine Islands, June 24.—The detachment of Philippine Constabulary sent out in pursuit of the company of mutineers, who went out on June 6, have overtaken the mutineers in the mountains. In an engagement the leader of the mutineers was killed and five of the rebels were captured.

MANILA, June 14.—Brigadier-General Harry H. Bandholtz, chief of the Philippine Constabulary, who is at present on a tour of inspection in the island of Jolo, will at once proceed to Davao, Mindanao island, the scene of the mutiny of the Second Company of Constabulary on June 6, news of which reached here yesterday. General Bandholtz will assume personal command of the Constabulary forces in the field that have been sent in pursuit of the mutineers.

The Insular Government is determined to make an example of the mutinous Visayans, who fled to the mountain fastness in the interior, and the pursuit will be pressed with the utmost vigor until the last one of the mutineers has been captured. Several columns of troops, both regulars and Constabulary, are already in the field.

No additional details of the mutiny and three hours' fight made by Governor Walker and the Americans in the church at Davao have been received here. No telegraph line connects with Davao, which lies in the southeastern part of Mindanao and is the capital of the province of the same name. The only communication is by the steamer from Zamboanga, a naval station on the extreme southwestern point of Mindanao, or from Malabang.

PROSTRATIONS AND DEATHS FROM HEAT IN THE EAST

NEW YORK, June 24.—There were twelve deaths here yesterday from heat prostrations and scores have been treated in the emergency hospitals. Last night twenty thousand persons slept in the open air on the benches in the parks.

PHILADELPHIA IN HOT WAVE.

PHILADELPHIA, June 24.—Four deaths as a result of the heat and a score of prostrations were reported here yesterday.

ONCE AGAIN WILL BE "THE BOYS IN BLUE"

WASHINGTON, June 24.—The War Department has decided to discontinue the use of brown canvas uniforms in the Army, and will substitute uniforms of blue denim.

Inquiries of a military officer last night in regard to the significance of this despatch brought a statement that the brown canvas uniforms referred to are probably those worn as working clothes by Cavalrymen, around the stables, and by the Engineers, in their rough work. It was not thought that the khaki uniforms was to be superceded by the blue altogether.

DUTY ON FRESH PINES IS RAISED A LITTLE

WASHINGTON, June 24.—The Senate has voted to increase the duty on fresh pines from seven to eight dollars a thousand, when crated, and half a cent a pound when imported in bulk.

FORD CAR WINS BIG RACE

SEATTLE, June 24.—The Ford car, entered in the transcontinental race from New York to Seattle, arrived here yesterday, the winner of the transcontinental cup and a purse of \$2000. The time made was twenty-two days and fifty-five minutes.

AFTERNOON CABLE REPORT

REVENUE FROM LUMBER.

WASHINGTON, D. C., June 23.—The

Senate has today adopted the provision in the tariff calling for a duty of \$1.50 on lumber, per thousand feet.

LOST LIVES IN KILLARNEY.

KILLARNEY, Ireland, June 23.—A party made up of nine tourists from the United States met death by drowning in the lake today. Two boatmen, engaged by the visitors, also lost their lives.

DEADLY FIREDAMP AGAIN.

WEHEM, Pa., June 23.—An explosion of firedamp occurred in a coal mine in this district today. Eighteen men working in the mine at the time were killed and six others were so injured in the explosion that they cannot live. Thirty miners are still imprisoned in the mine, which is burning, and there is little hope of their rescue.

PROBING THE SIGEL MYSTERY.

NEW YORK, June 23.—The Chinese Chung Sin, supposed to be implicated in the murder of the slum worker, Miss Sigel, has been severely sweated by the police and under their questioning he accuses a fellow countryman, Leong Ling, who he yesterday stated had been familiar with the victim, with the brutal strangling of the woman. The police are in pursuit of Ling.
